**Attachments**

Various attachments with non-slip matting on their base let you design your furniture individually.

Metal colours for legs

Some legs can be ordered in silver or black-coloured. Please indicate when ordering.

Smart attachments

Create a corner or a one arm chair with the back cushion attachment EK. Or with the cuddly attachment PW.

Electrical supply

An electric box can be ordered for the furniture for power supply and USB ports. See order information.

„Flame retardant“

Optionally, the „flame-retardant“ version of this model can be ordered (art. no. = BK ..). **Please specify when ordering.**

ORDER INFORMATION**Attachments:**

The attachments have non-slip matting on their base, which allows individual design. Staining of the leather and detachment of the natural material will not occur with everyday use. The furniture fabric will not become pilled or discoloured. This has been tested at a revolution rate of 30,000 abrasion cycles.

Connection bundle:

The connection bundle consists of two metal rails. It allows the elements N 148, N 185 and N 222 to be firmly connected together in an

assembly. For this purpose, each element has screws on the required connecting sides. The metal rails supplied can then be attached individually. Depending on the order, you will receive different numbers of connectors, the quantity of which is determined by the manufacturer.

Electrical unit:

The electrical unit is equipped with USB connection and power supply. The USB output is 1x 5 V/ 1 A and 1x 5 V/2,1 A - sufficient to charge all common devices, including tablet PC. In front

of the left is the socket (220V), on the right is the USB unit with 2 connectors. The electrical unit can be integrated at the bottom of the seat frame for each item.

Seam appearance:

Decorative, felled or double seams may appear different in fabric and leather versions. For manufacturing reasons, seams may be left out of the fabric version or replaced with simple seams.

Contrasting thread:

In some leather colours, this model can be

supplied with a contrasting coloured thread, at no surcharge. Please always specify the contrasting thread number or tonal colours will be supplied.

All of the dimensions given are approximate dimensions in cm in width/depth/height/seat height. We reserve the right to make changes.

Crease formation:

Fabric and leather stretch during use, „creases“ may form in the cover. This has no influence on use, function and service life and does not

constitute a material defect.

Note on upholstery construction:

Ticking cushions have been used in the back. These may show under the cover. This is a typical feature of the product.

Digital fabric/leather and colour samples:

The visual appearance of the covers and colour samples may vary, samples in accordance - colour and structure deviations possible.
